Technical skills

General
.NET / C#
Python
JavaScript
TypeScript

Backend
ASP.NET Core
REST APIs
Entity Framework Core
SQL Server, PostgreSQL
Kafka
Clean Architecture
Microservices
JWT Authentication

Frontend
Angular
React
TanStack Query
HTML, CSS, Tailwind

Cloud & DevOps
Azure
Azure App Service
Azure OpenAI
Azure AI Vision
Docker
Bicep
GitHub Actions
AWS

Tools
Git + GitHub
Azure DevOps
VS Code
xUnit
TDD

Johan Janérs

Backend Developer | .NET / C# | Azure | Applied AI

Stockholm, Sweden | johanjaners@gmail.com | +46 761 089 671

Backend developer with current production .NET experience at Sandvik and hands-on project experience integrating Azure OpenAI and Azure AI Vision. Focused on building reliable backend systems, APIs, and maintainable web applications using modern .NET technologies.

Brings 6+ years of broader engineering experience from cross functional technical environments.

WORK EXPERIENCE

Backend Developer
Sandvik (consultant via Infuse Talent) | Jul 2026 - Present
Developing backend functionality for Toolhive, a cloud based production platform in a .NET, Angular, Azure, Docker, and Bicep environment.

Consultant .NET Developer
School of Applied Technology (SALT) | Feb 2026 - Apr 2026
Delivered backend and AI focused development sprints through SALT's Graduate Program, including microservices architecture, event driven services with Kafka, and AI integrated web applications.

Performance Data Engineer
Polestar | 2025
Developed Python tools for log data processing, KPI reporting, and structured data exports. Built modular processing flows with loaders, extractors, and exporters.

Test Engineer
Polestar | 2022 - 2025
Worked in cross functional technical environments involving software, hardware, validation, data analysis, planning, and documented test execution.

Design Engineer
Polestar | 2019 - 2022
Contributed to technical requirements, system integration, and prototype development in complex engineering projects.

PROJECTS

Note2QuizAI
ASP.NET Core, React, Azure AI Vision, Azure OpenAI, AWS
AI powered quiz generator for uploaded notes. Built backend flows for quiz generation, submission, and scoring. Integrated Azure AI Vision and Azure OpenAI, with AWS deployment configuration.

Recipe Search API
ASP.NET Core, Azure OpenAI, PostgreSQL, EF Core, Azure App Service
Backend API with multilingual query interpretation using Azure OpenAI, PostgreSQL persistence through EF Core, and deterministic recipe ranking. Deployed to Azure App Service.

Event Driven Payment Service
.NET, Kafka, EF Core, PostgreSQL
Event driven payment and invoice service. Implemented payment lifecycle flows, asynchronous event handling, persistence, event contract alignment, and integration testing.

PulseCare
ASP.NET Core, React, SQL Server, Docker, JWT
Team built healthcare platform. Owned appointment related APIs, CRUD operations, JWT based authentication, and frontend integration.

EDUCATION AND TRAINING

Full-Stack .NET / C#
School of Applied Technology (SALT) | Oct 2025 - Jan 2026
Intensive program in fullstack development with C#, .NET, React, TypeScript, TDD, mob programming, and applied learning.

M.Sc. Mechanical Engineering
Luleå University of Technology | 2014 - 2019
Master's degree focused on technical problem solving, simulation, and systems development.
